

## Customer case study

### God Blessings

A tallest residential tower in pune with complete automated Elevator Systems solutions provided by Smart I

Swapnali Bhosale Construction, a part of ABIL (Avinash Bhosale Group) group is one of Pune's most respected Builder-Developers, with a track record going back three decades. They have pioneered the development of the area next to University of Pune in the 1970's with the landmark BHOSALE NAGAR, which, even today, is one of Pune's most envied residential complexes.

God Blessings (Pune's Tallest and most luxurious Residential Building), 100-m building in Koregaon Park is being developed by Swapnali Bhosale Construction. The 24-storeyed residential structure offers 24 spacious 7,500-square-feet, five BHK apartments

3 elevators (two from Kinetic and one from Mitsubishi) are installed in God Blessings for the comfort of the residents.

Bhosale constructions wanted to automate the entire elevator system so that only residents or authorised users can access the lift and making sure that they can access only their floor. Also this would help the security to have a control over trespassers.

### Solution Offered by Smart I

Smart I has offered Lift control solutions which consist of 'smartELEVATOR'- a controller along with 'BIOsingle'- a biometric reader. 'smartELEVATOR' (Controller) is placed at the control panel of the lift. It is connected with BIOsingle (biometric reader) which is fixed inside the lift near the car panel. The fingers of the residents are enrolled on BIOsingle (biometric reader)

When the resident places the finger on the biometric reader only his particular floors button gets enabled on the car panel. He then presses the button and goes to his respective floor. It also helps to prevent lift access to unauthorized people. Security in charge of the building escorts the visitors to the apartments if required.

### Products Used:-

**No Of Floors:- 24**

**Controller :- smartELEVATOR (1 Master 2 Slave for every Elevator)**

**SEV820-X - 3 no.**

**SEV810-SV - 6 no.**

**Biometric Reader :- BIOsingle (SBSN150-P) 3 qty (1 for each elevator)**

**Lift Make : - Mitsubishi - 1 no**

**Kinetic : - 2 no**
