

smartACCESS

Desktop Based Access Management Software

smartACCESS is a Desktop based Access Management software especially designed to cater small, medium and large organizations, where significance of security is very high. Software has very user friendly GUI with all the functions of Access Control Management. Software has various other functions i.e. Device configuration, masters, data downloading, User Enrollment Module, Mass uploading, Employee Card Activation/Deactivation, etc.

KEY BENEFITS

- **Device Management:** It provides a user friendly interface to manage the Access and time attendance devices. All configurations of devices can be done through central software. It downloads the data periodically/automatically for generating various access reports.
- **Comprehensive Access Management:** Software facilitates to define various kinds of Access management rules and restrictions for devices. It could be at various levels e.g.; Controller level, Reader Level, Employee level, Access level Group, location level, etc. Access rules comprises with Time Zones, Access Levels, Holiday restriction, Anti Pass back (Hard, Soft, Nested, local, Reader wise, controller wise, APB Forgiveness), Blacklist of employee, etc.
- **Useful MIS Reports:** Software has various reports which is very useful for any organizations i.e. Employee Status Reports, Access reports, In Out reports, Immediate Report, etc.
- **Email & SMS notification:** Email and SMS notification can be sent for any configured process i.e. on late coming, Early going, Absenteeism, Black listed employee swipe, etc.

Many highly prestigious organizations from many sectors such as Banking, Pharma, IT, Mega Retail, Government etc. have been using various Access Control, Time and Attendance and Security related systems of smart-i in many of their establishments all over India, for many years.

- + Visit Zone
- + Time Slot
- + Access Level
- + Access Level Group
- + Holiday restriction (Reader Wise)
- + Blacklist of employee
- + Duress Authentications
- + Dual Authentications
- + Configurable delay time for two successive punch from same
- + Controller communication status
- + Displaying Short Messages
- + Centralize fingerprint Template Management
- + Bulk upload of cards
- + Support Maximum 9,999 controller

- + Configurable Auto/ Manual/ Scheduled Data Downloading
- + Controller Reset command
- + Block Admin/User of controller
- + Device Configuration – Push/Pull
- + Door Open Time Configuration
- + Door Auto Relock
- + Reader open Time
- + Facility Code supported
- + Audit Log
- + Event Wise mail
- + Central Date & time Synchronization
- + User wise Latest swipe display
- + Controller wise Latest swipe display

Anti Passback

- + APB Enable/Disable
- + Hard APB
- + Soft APB
- + Nested
- + Local
- + User wise
- + Reader wise
- + controller wise
- + APB Forgiveness
- + Escort APB

Database Management

- + MS-SQL Server 2005 or, Higher
- + Database Back Up
- + Excel sheet Import for masters data

Masters

- + Employee
- + Company
- + Locations
- + Controllers
- + Readers
- + Department
- + Designation
- + Holiday
- + Category
- + Access Reports
- + Employee Activate Status
- + Employee Master – Access
- + Event
- + First In Last Out
- + Immediate Report
- + IO Entry
- + Unknown Transactions
- + Department
- + Designation
- + Holiday
- + Access
- + Audit Master

Reports Formats

- + PDF, Excel

INTEGRATIONS

- + Third Party Payroll
- + SAP/ERP/HRMS

Software Selection Guide
